

TRIP to
conserve

05 - 07 OCT, 2018

JOR, MAHABALESHWAR, INDIA

3 TREKS IN 3 DAYS!

Explore varied landscapes off the beaten path on 3 different trails at these Western Ghats. The unexplored jungles are home to very varied wildlife.

SCIENTIFIC RESEARCH

First hand exposure to identifying animal signs, tracking techniques & use of technology in conservation. And, a peek at what conservation strategies actually work!

INSPIRED ADVENTURE

Camping in the wild, river crossings, cooking outdoors, barbecue, learning forest survival skills are just some of the thrills.

HOW YOU CONTRIBUTE TO WILDLIFE CONSERVATION

The appreciation of Wildlife research, process of data collection and formulation of conservation strategies helps in better understanding and is a first step.

Programs like these help in data collection, getting individuals involved in conservation, outreach, and the funds generated directly help research of endangered species.
